With over 3,000 successful installations worldwide, the Vicon family of machinery is the industry proven solution. At Plasma Automation Inc. & Vicon Machinery LLC we are committed to complete customer satisfaction. Whether it be our knowledgeable sales force guiding you through the sales process, our experienced and professional technicians training you on site, or our in-house team supporting you long after the sale, customer service is our top priority. Our corporate office is headquartered in Long Island, NY with factories located in Meadville, PA and Pevely, MO. Our product line encompasses HVAC, Fabrication, and Precision Systems. We are certain we have a solution for you. Standard with every machine purchase is our unrivaled one-year systems warranty that includes parts and labor; on-site set up and training, and telephone technical support for as long as you own your machine... all at no additional cost. We pride ourselves as the leader in complete turn-key solutions. We build the machine, we write the software, and we support the solution. It's that simple! The principals of Vicon are committed to the industry. Proof of that is present with the continued introduction of new products as recently demonstrated at the AHR EXPO 2015 in Chicago, IL. Vicon continues to manufacture both standard and custom heavy duty coil duct processing systems specific to our customers individual manufacturing requirements along with a complete line of HVAC plasma cutting systems, duct fabrication equipment, and custom rollforming machines. The Vicon of your future... Plasma Automation Inc. & Vicon Machinery LLC.
