With 23 plants in 16 countries, Armacell has global network of manufacturing capabilities. To better serve US-based customers, Armacell operates five US manufacturing facilities, and one in Canada. The headquarters for the Americas is located in Chapel Hill, NC.

Armacell is a global innovator in foam technologies and the world leader in flexible mechanical insulation materials. Armacell produces the Armaflex® family of products, the most trusted brand in flexible, fiber-free mechanical insulation. The closed-cell technology of elastomeric foam provides longer-lasting performance, consistent thermal efficiency and critical condensation control for HVAC applications. Armacell makes a full line of duct liners including AP Coilflex for automatic coil lines and AP Spiralflex, the first elastomeric duct liner engineered especially for spiral ducts.
