Carlisle HVAC Products' high-performance Exterior Line Set Protection products can be used in a wide variety of applications to provide a professional finished look that meets code requirements.

Carlisle's TPO Line Set Wrap provides excellent protection from UV rays, moisture, wind, and landscaping operations. High-performance, dimensionally stable TPO Line Set Wrap also offers a quick, labor-saving application: simply apply to the exterior of the pipe wrap insulation and peel off the release liner for an aesthetically pleasing, professional finished look that meets code requirements.

Carlisle's White SEAL-TACK™ is specially designed to coat foam insulation and protect against UV damage, moisture, mold and mildew, and severe weather. Water-based, non-flammable SEAL-TACK can be applied in a wide range of temperatures and conditions and is ideal for both outdoor and indoor line set protection. White SEAL-TACK meets code requirements and its application flexibility makes it ideal for virtually any project.
