With over ten years of international experience, JAG Sheet Metal Machinery's line of HVAC equipment is now available in the U.S. We provide a broad range of standard machines including Seamers, Flangers, Corner Fixers, Automated Seam Closers, Pneumatic Brakes and more. Combining exceptional performance and quality with low "used machine" pricing, JAG Machinery's line of duct manufacturing equipment establishes a new level of value in the industry.

Based on proven designs, JAG machinery is produced to exacting U.S. standards with no compromises in material, tolerances or component quality. Our rugged and durable equipment is built to provide years of dependable service and is backed by a full product warranty. Offering a complete range of features and options, JAG equipment is engineered to enhance your productivity and keep your shop running smoothly.

Our new facility designed specifically for producing metal forming equipment enables us to achieve low production costs while maintaining rigorous standards of quality and efficiency. A skilled staff of experienced professionals keeps the company at the leading edge of duct fabrication technology. Together, JAG Machinery's facilities, knowledgeable staff, and demanding standards assure the consistent supply of high quality, low cost HVAC equipment.
