RAS, a German Company, has been manufacturing quality sheet metal fabricating machines for over 75 years.

Products include CNC Metal Folders, Shears, swaging, crimping, rounding and seaming machines and are capable of supplying fully automated lines. RAS equipment provides sheet metal products that fit like a glove in the field and can be produced by one operator in the shop, are simple to operate and unbelievably productive.

If you would like to improve your sheet metal manufacturing process, give us a call.
