Spiral-Helix, Inc a proud member of the SPIRO S.A. group is:

The Right Choice for Superior Performance

Since 1961 SPIRAL-HELIX, Inc. has been engaged in the design, engineering and manufacturing of quality spiral duct machinery. We offer a one-stop-shop for your spiral duct and fitting machine needs.

Our product portfolio includes the following spiral duct and fitting machines:

Tubeformers (Spiral Duct Machine): A

Tubeformer is a spiral duct machine that produces straight round spiral ducts and is mostly applied in the HVAC industry. Spiro® is the inventor of original spiral duct machines with more than 60 years of experience.

Gorelockers (Elbow Making Machine): A Spiro®

Gorelocker is an elbow making machine that is critical in the process of making round fabricated bends and fittings. This high quality elbow maker is used for flanging and folding the welded segments.

Stitchwelders: Our Stitchwelders make the stitch

welding process smooth, continuous, and airtight. This resistance welding application is mostly used in the HVAC and sheet metal industry to produce fabricated bends and fittings.

Fittingshaper: The Fittingshaper contributes vitally to reduce the leakage rate in the ventilation system, resulting in reduced energy consumption costs!

Our commitment to excellence also extends to our leading after-sales service and support programs. Our highly trained technicians will install and set up each machine and train your personnel on all facets of the machine's operation and maintenance. SPIRAL-HELIX maintains a large stock of spare parts, and technicians are on call to answer any questions that our customers might have.
