Model 400x

21 lb Commercial DucTester

Retrotec's Model 400x is a truly lightweight handheld commercial duct tester. Eliminate the need for two techs to perform a test.

Measure duct leakage in commercial systems up to 295 CFM at 8 inches Water Column. Test 7,000 square feet of commercial ductwork.

Results in any desirable unit such as CFM / 100 square feet. Or complete a test and have the software generate a custom report with your logo.

The 400x includes even more improvements from the former Model 400. Mount your DM32 WiFi Gauge directly onto the shell for easy accessibility. A new foot design allows for a secure, sturdy base.

Model	**400x**	
	Flow Into Back Pressure of:	CFM
Maximum Flow (CFM) at 120 or 230 VAC:	1 in WC (250 Pa)	306
	4 in WC (1000 Pa)	302
	8 in WC (2000 Pa)	295
Minimum Flow with std Range 18:	1 in WC (250 Pa)	7.1
Minimum Flow (with opt Range 3):		0.31
Weight of System:	21 lb	
Flow Accuracy:	+/-5%	
Power input:	120 V AC, 15.5 A, 50/60 Hz, 1 phase	
Recommended Fan Calibration Interval:	5 years	
Digital Gauge Model:	DM32 WiFi	
Special Features:	This special DM32 WiFi has a 20 in. WC (5000 Pa) sensor.	
Test Direction:	Pressurization. Optional Depressurization Adapter available.	

* The max flow of the fan will vary depending on the following factors: barometric pressure, back pressure, blade pitch, air temperature, bearing tightness, inlet air turbulence, length of flex duct
